

What is claimed is:

1. A method for registering an identifier comprising the steps of:
recording images in a storing unit of a digital video device as an identifier;
5 and
managing channels of the digital video device on the basis of the recorded
image identifier.

2. The method of claim 1, further comprising a step of recording
10 characters in the storing unit of the digital video device as an identifier.

3. The method of claim 2, further comprising a step of registering
preference channels selected by a user to a list for inputting channels
corresponding to the image identifier and the characters identifier.

15 4. A method for registering an identifier comprising the steps of:
displaying images on a screen of a digital video device; and
registering an image selected by a user among the displayed images as
an identifier.

20 5. The method of claim 4, wherein the step of displaying images
comprises the steps of:

connecting a memory card where photo images are recorded to the digital
video device; and

25 displaying images recorded in the memory card on the screen of the

digital video device.

6. The method of claim 4, further comprising the steps of:
registering the identifier and then displaying a list for selecting preference
5 channels on the screen; and
registering preference channels selected by a user corresponding to the
image identifier.

7. The method of claim 6, wherein the list for selecting preference
10 channels is displayed on the screen as an 'On Screen Display' form.

8. The method of claim 4, further comprising a step of registering the
image as a first identifier and then registering characters as a second identifier.

15 9. The method of claim 4, wherein the identifier is images for
managing channels of the digital video device and endowing a watching right of
specific channels.

10. The method of claim 4, wherein the identifier is images for
20 distinguishing family members.

11. The method of claim 4, wherein the identifier is photo images of
family members.

25 12. A method for registering an identifier comprising the steps of:

connecting a memory card where photo images are recorded to a digital video device;

displaying images recorded in the memory card on a screen of the digital video device;

5 registering an image selected by a user among the displayed images as an identifier;

displaying the image identifier and a channel input item corresponding to the image identifier on the screen; and

10 registering inputted preference channels when a user's preference channels are inputted to the channel input item.

13. The method of claim 12, wherein the step of registering preference channels comprises the steps of:

15 displaying channels corresponding to an analogue TV broadcasting, a digital TV broadcasting, and a cable TV broadcasting on the screen as an 'On Screen Display' form; and

registering preference channels selected by the user to the channel input item if the user selects preference channels among the channels.

20 14. The method of claim 12, further comprising a step of registering the image identifier and additionally registering a character identifier.

15 15. The method of claim 12, wherein the identifier is images for managing channels of the digital video device and endowing a watching right of specific channels.

16. The method of claim 12, wherein the identifier is images for distinguishing family members.

17. The method of claim 12, wherein the identifier is photo images of
5 family members.
